

4-20ma LED Level Meter Product Specifications and Installation Data

1 DESCRIPTION

The HE693LEV640 is a panel mountable level meter. The LEV640 accepts a 4-20mA signal and activates a number of vertically oriented LEDs proportional to the magnitude of the current input. The LEV640 features 64 LEDs, which provide a resolution of 0.25mA. The LEV640 is powered from 24VDC and features a three-position terminal strip for input power, common, and input current. The LEV640 is provided without a silkscreen. Optional custom silkscreens are available. The LEV640 is rated for NEMA 12 operation.
