

Operator Interface Unit

Product Specifications and Installation Data

1 DESCRIPTION

The Operator Interface Unit HE693OIU720/725 are members of Horner's (HE) family of Operator Interface Products. They feature a large, brilliant vacuum fluorescent display with characters nearly 0.5" in height (11mm). A full alphanumeric keypad and 12 function keys are present to aid the operator in the performance of machine control tasks. The HE693OIU720/725 have been specifically designed for project use with the application messages and function key legends applied at the factory. The products have also been specially coated and potted for environmental considerations.

2 SPECIFICATIONS

For specifications and operational details, consult the HE user manual (MAN0066). All specifications and operational instructions contained therein for the HE693OIU357 apply to the HE693OIU720/725. The HE693OIU720/725 are customized versions of the HE693OIU357 with the following exceptions:

- a. The OIU720/725 contain the application setup preinstalled at the factory,
- b. The OIU720/725 contain a custom function key insert installed at the factory,
- c. The OIU720/725 have had potting compound added at the factory for environmental considerations,
- d. The OIU720/725 have been conformally coated at the factory for environmental considerations.
