CSCAPE 10

Horner's FREE Intuitive
Programming and HMI Design Software

For all users of our Micro, XL,
Prime Series and the NEW
Canvas Collection Controllers
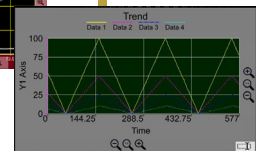

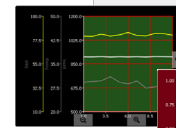

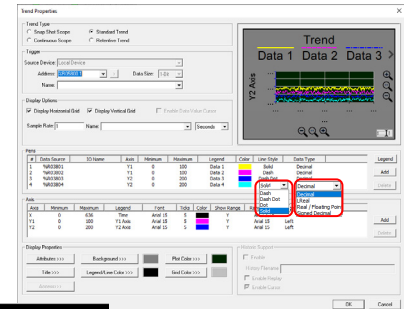

New Release, Endless Possibilities

As a major new release, Cscape 10 features a redesigned user interface and among its dozens of improvements includes the newly developed Advanced Graphics Engine. This Advanced Graphics Engine supports a number of graphic building blocks for user interface design that have been reimagined from the ground-up. These include (but are not limited to) Trend, XY Graph and Scatter Graph objects; a Recipe object, Alarm objects and a Video playback object.

NEW FEATURES:

User Interface Upgrades

- Ribbon Bar
- Editing in Tabs
- Graphics Toolbox
- Ladder Graphics
- Combined Settings
- Backup Improvements
- New File Wizard
- Project Navigator Updates

Graphic Object Upgrades

- Background Selection
- Slide & Rotary Objects
- Data & Indicator Objects
- Menu & Recipe Objects
- Trend & Graph Objects
- Switch & Selector Objects
- WebMI Plus
- Extensive Symbol Library
- Video Object and more!

CSCAPE 10 CONTROLLER FEATURES
